## CUSTOMIZED DIET PLAN

### Basic Details

Name	Sarath
LFL-ID	PT1163
Age	29
Weight	75
Height	171
Body fat	23%
BMR (With Body Mass)	1678.75
BMR (With Lean Mass)	1505.75
TDEE	2333.9125
Target Calories	1700
Goal	Fat Loss
Country	India
Diet Plan	KETO IF - NV

***Dear Sarath,***

Based on your request we are changing your diet plan to a Ketogenic diet. Kindly start the diet from tomorrow to keep the diet on track. In this diet, you will be consuming 42.8 g of carbohydrates, 108g of Protein and 110g of fat.

#### **What is a ketogenic diet?**

The main idea behind a keto diet is to shift your body's metabolism. Instead of mainly burning carbohydrates to obtain energy, your body will switch to burning fats and ketones. In

---

order to achieve this effect, you will need to change the proportion of your macronutrient intake. The typical keto macros ratio is 70% fats, 5% carbohydrates, and 25% protein.

Once the structure of your macros changes, your body will enter a state called ketosis. Since you're not providing enough carbohydrates to allow it to generate energy from glucose, your body will start burning fat. When your body breaks down fat stored in your cells to produce energy. The ketosis sets in your body after 3-4 days of following the keto diet.

**Note:** Exceeding the carbs more than the quantity mentioned in the diet chart can **break the ketosis process**. Once the ketosis is broken, it will take another 3 to 4 days to start the ketosis process again. One time break will take 3 days of your effort, so think twice before you break the keto. Following the diet for 3 - 4 weeks continuously can give enormous benefits.

### What is Intermittent Fasting?

Intermittent Fasting is a concept of keeping the fasting window as 16 hours and the feeding window as 8 hours, during the fasting window only non caloric foods are allowed So the given diet needs to be taken only during your feeding period.

However, non caloric drinks such as Lemon water, Green tea, Black tea, Black coffee without any sugar or sweetener can be taken during the fasting hour and there is absolutely no restriction on water intake.

### How long should I stick to this diet?

If weight loss has stalled for 4-5 weeks while following a diet, it may be time to consider making some adjustments to the diet. One option could be to reduce calorie intake by 200-300 kcal per day, while still maintaining a low carbohydrate intake. This could help create a calorie deficit and promote weight loss.

Kindly Use the **Live Fit Life** Application to track your macros and calories intake. Calculating the ingredients will help you to stick to the diet plan.

**Weight Management:** Please share your weight update, The information can be transferred via the trainer during the session, which helps us to keep a track.

**While Being on diet it is important to intake Micronutrients supplements to keep our internal functionality healthy. So kindly take the below supplements.**

Supplement Name	Suggested Brand	Dosage	Time to be taken and Duration
Multi vitamin	A to Z OR Zincovit OR Nutrilite	1 Tablet / 4 days in a week	After Meal 1 for next 75 days *For B complex next 5 months only
Shelcal (Calcium + Vitamin D3)	Shelcal XT	1 Tablet / Day	After Meal 2 for next 75 days
Omega 3	HealthKart HK Vitals OR Neuherbs OR Wow Life Science	(1000 to 1500mg) - 4 days in a week	Before bed time (Night) / Choose alternative days for next 75 days *For Isabgol - follow till Keto
Isabgol	Cipla OR Dabur OR Patanjali	5g OR 1 Tsp / 3 days in a week	

### **Do's & Don'ts:**

- Aim to drink 3 – 4 liters of water in a day. Keep yourself hydrating.
- Make sure you weigh all your foods with a kitchen weighing scale.
- Macros calculations are important to be followed to achieve your goal.
- Your Mealtime is not super mandatory, following a regular time can help you avoid a starvation state. Intake all the mentioned macros quantity within that day.
- Do not sauté or deep fry the food, avoid processed, artificial foods. (canned, ketchup, sauces)
- **Note: For a diet, reduce your salt intake than the usual (Preferably less than 2-3g or 1 tsp/day).**
- Take any mentioned meal or snacks for every 3 hours. Feeding healthy nutrition for every 2.5 – 3 hours will keep your body in an anabolic state throughout the day.
- Keep us updated with your weight progress twice in a week to monitor your progression. We will have to change the diet if required.
